Junior Leadership and Management
Development Programme

The reality

Junior leaders (First Line Managers) are notoriously ill-equipped for their roles.

Often promoted on technical or functional expertise, they have little or no exposure to the required behavioural and values-based transitions, business knowledge and skills to lead effectively and get results through others.

They are also often managing and leading complex and challenging workforces and are seldomly coached by their managers.

This is ironic as they play a critical role as the conduit between strategy, management goals and execution.

The opportunity

The effective development of Junior Leaders (JL) is key to high-performance and business success.

Here's an opportunity for you to develop these crucial role players:

- comprehensively
- professionally and
- cost-effectively.

Customised to meet your needs, **iLEAD** is an accredited and holistic Junior Leadership Development programme that integrates with your operational environment.

Whether delivered as a Learnership or Short Learning Programme (SLP), **iLEAD** goes beyond equipping your junior leaders with essential skills. It also unlocks a range of financial advantages, ensuring a positive return on investment for your organisation.

- The first phase (Company specific modules) can be a standalone credit bearing Short Learning Programme (SLP)
- Top candidates of the SPL can progress to complete the full learnership
- BBBEE and Seta benefits

Implementation flow

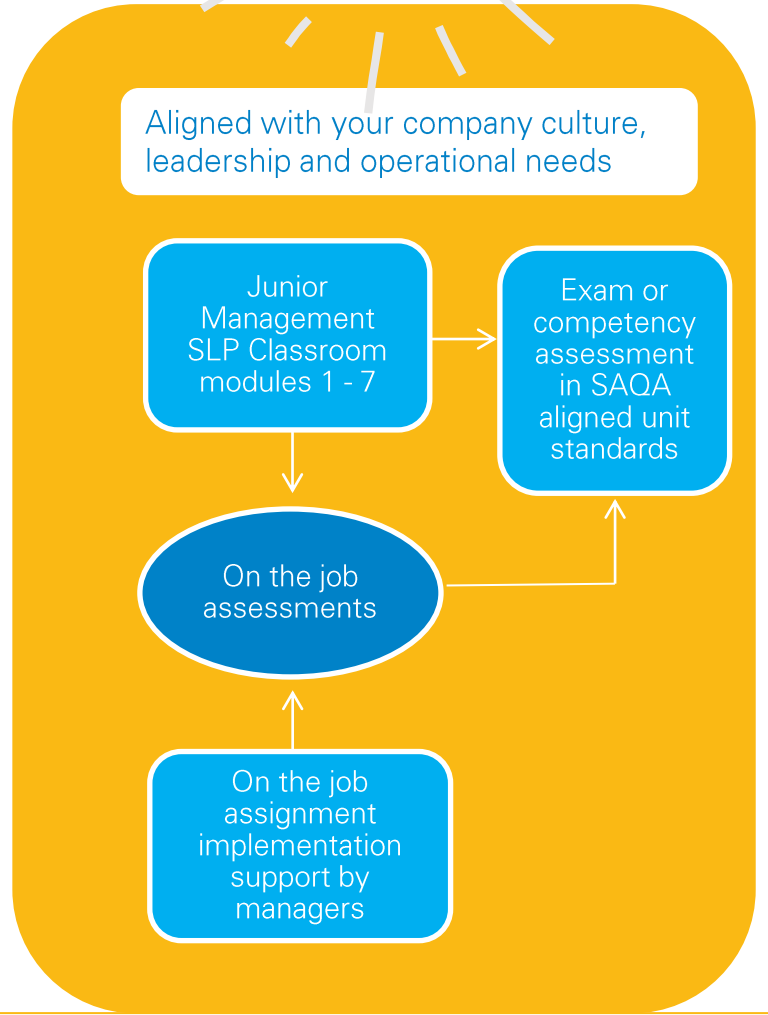

Full Learnership (Category D)

Short Learning Programme (SLP) (Category E)

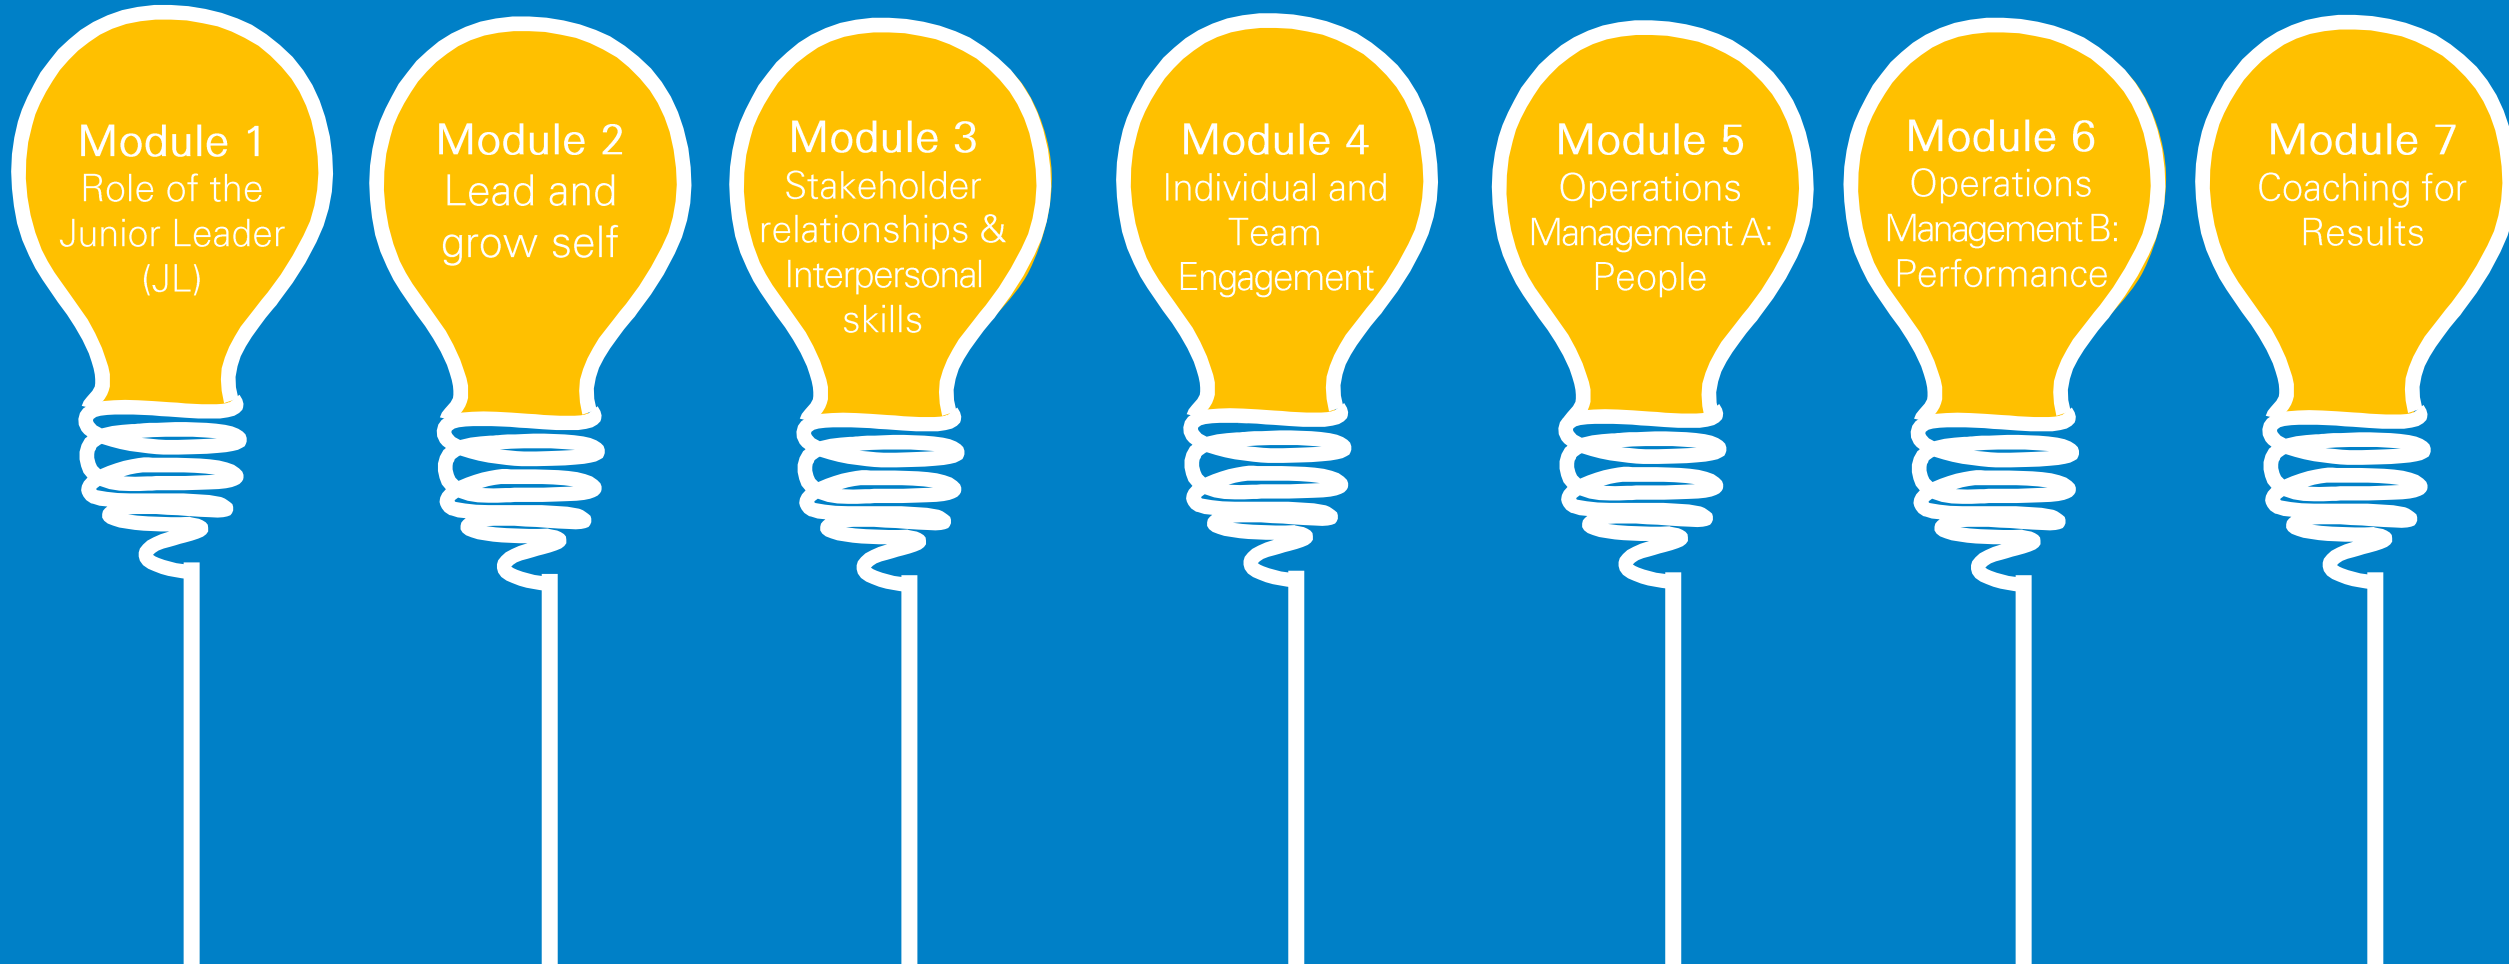

Unpacking Modules 1 - 7

The modules

Learning Outcomes

Content Overview

1. Understand the business significance of the JL as Operational Executor

- How a business works: turnover, cost and profit
- JL's levels of accountability for strategy execution
- The need for POLC (operational management)
- Operational costs and basic cost management
- Your KPI's

2. Understand the correlation between team buy-in and team performance

- The power in team maximisation: from potential to performance
- The JL's 3 roles: manager, leader, coach
- Power, Authority and Influence: the balance between managing and leading.

Learning Outcomes

1. Describe what self-leadership is and why it is important
2. Understand the role self-leadership plays in leading others
3. Describe the components of self-leadership
4. Apply the knowledge, skills and tools for each self-leadership component and lead yourself effectively

Content Overview

- What self-leadership is
 - Why it is important for your success
 - How you can benefit from strengthening this
-
- Self-leadership: the foundation for leading others and achieving success
 - The impact of a weak foundation on achieving results
-
- Self-leadership: a model for understanding the components and how they fit together
-
- Self-awareness, self-management and self-confidence:
 - What each is about
 - Its role in self-leadership
 - The tools and skills to better manage that aspect.

Learning Outcomes

Content Overview

1. Understand the importance of getting results through and with people

- Getting results with and through and people
- The value chain: your need for constructive relationships

2. Define your stakeholder map

- What a stakeholder is
- Your stake holder map i.r.t. the PoIS matrix*
- How to grow your relationships

3. Know how to lead in a diverse environment

- What DEIB is, why it is important and how it benefits all stakeholders
- What it requires from JL's to grow a culture of inclusion and belonging in your teams

4. Apply the knowledge, skills and tools to build rapport and connection

- What rapport is and its benefits in your relationships
- The scale of rapport
- Grow your rapport with your stakeholders

5. Use key interpersonal skills to get results

- Build effective relationships by growing and showing trust, empathy and respect
- Communicate effectively through walking the talk, sharing the right things at the right time with the right channels, shaping your message and what your silence says.

Module 3
Stakeholder
relationships
and
Interpersonal
skills

Learning Outcomes

1. Understand what Employee Engagement is and why it is important for your success

- What Employee Engagement (EE) is
- Why it is important: how it benefits all stakeholders
- The current reality in your team and the causes
- Your role as JL in EE

2. Apply the knowledge, skills and tools to grow and maintain high Employee Engagement in your team

- **Inspire them through your leadership**
 - Create a conducive environment: what this looks like and how to do it:
 - Give them direction (4P's)
 - Adopt an engaging leadership style
 - Build strong relationships
 - Lead by example (the company's values)
- **Include them through your facilitation**
 - Create context; Manage your approach and energy; Use questions effectively; Listen actively; Follow-up and follow-through
- **Involve them through your team meetings**
 - Effective team meetings: what they look like and their benefits
 - Your current reality: self-assessment
 - How to conduct effective team meetings: implementation plan
- **Improve them with your feedback**
 - What feedback is, why it is important and its benefits
 - Different kinds of feedback
 - A recipe to give constructive feedback
 - Feedback: a 2-way street

Module 4
Individual and
Team
Engagement

Learning Outcomes

Content Overview

1. Understand the pre-conditions for operational performance and how to set them up

- Climate: a pre-condition for performance
- Provide the MEANS
- Ensure competence (Ability / BASK)
- Set team members up for success: one-on-one conversations and team meetings

2. Know how to respond to levels of operational performance

- Hold people accountable for results: assertive floor management
- The 3F's: Focus, Firm, Fair
- Feedback:
 - Appreciation and recognition
 - Encouragement
 - Correction
 - Coaching

3. Understand basic operational value chain management and manage internal suppliers and customers

- The principles of a value chain in operational process flow: the need to manage this
- Your internal supplier value chain: who they are; their significance; what they require vs the current reality
- From conflict to co-operation
- Management techniques for internal suppliers and customers

Learning Outcomes

Content Overview

1. Understand and apply operational performance measurement →

- Scorecards in the operational context: know what is required operationally to perform on standard

2. Understand and apply the phases of a successful operational day →

- The 5 natural phases of an operational day
- What each phases requires from the JLs

3. Focus on the four operational areas in your work →

- The four operational focus areas ito people, equipment and material: availability, utilisation, efficiency and quality
- Contextualise each area: the reality, status and cost

4. Set up a feasible day plan →

- Draw up a day plan that works

5. Apply control and operational awareness techniques →

- Control techniques: basic project management skills
- Operational awareness techniques
 - Walk the floor (WTF) with intent and focus
 - Anticipate (problematic) operational situations
 - Growing the operational awareness of your team

Learning Outcomes

1. Understand what coaching is and how it differs from leading and managing

2. Know the different types of coaching and when each is required

3. Apply knowledge, skills and tools to coach effectively

- Introduction to Coaching
- A JL's coaching role: how it differs from and complements leading and managing
- The benefit for you and your team
- Your focus: address the gaps to ensure a balance as JL in your 3 roles

- The different types of coaching: skills, improved performance and development
- What each is used for and when
- Your focus: address the gaps to ensure a balance in your coaching

- Create a conducive coaching environment
 - What it is and why this is important
 - How to create it: (Trust, Intention, Thinking Environment, Relationship)
- Use coaching roles effectively
 - The 5 roles: what they are, when and how to use them
 - Your current focus: address the gaps to ensure all are used in the right way at the right time
- Conduct GROW conversations using the GROW model:
 - What the model comprises
 - How to use it to enhance your coaching conversations
- Coaching skills: the fundamentals – build on your questioning, listening and feedback skills in the coaching context

Module 7
Coaching for
Results
